

HEXAGON

Apart from square of nine, W.D. Gann has extensively used Hexagonal time price chart. This tool gives us hexagonal spiral levels in price and time. We can select degrees manually or can select the different aspects such as Trine, Square or Sextile thus selecting appropriate degrees needed for our study.

For applying Hexagon tool—

- Click on the  icon
- Square of 9 levels will pop up.
- By specifying the required information click on plot option.
- Hexagonal price and time levels will appear on the chart.
