

JTTL - JENKINS TRUE TRND LINES.

This tool plots the trend lines from the specified point. These lines are in combination with Gann's Square of 9. Because of this feature these trend lines are of immense importance. These trend lines act as a support or resistance to the scrip. JTTL lines are applied only on the calendar day chart.

How to apply JTTL

1. Click on the Jttl tool icon.
2. Window will appear.
3. In the first column specify the no. of lines you want.
4. The range of the line starts from 2 to 32.
5. In the second column you have to mention from where the lines to be plotted.. Whether from top or bottom.
6. In the third column you have to specify the days. Two options are given. 360 days or 365 days.
7. Click on whichever option you needed.
