

LOW EXTENSIONS LE

This tool will plot the doubling or the fibo extn of given low. You can apply it on all time low of the scrip or any other imp low.

For this, you have to select the LE option on the tool bar. The window will pop up. It will ask you for the doubling option and the fibo extn option. Doubling option will provide you the multiples of the given low. It can double the low upto 512 times. Fibo extn option will provide you the levels of fibo extn upto 76.012%. Choose the option you needed. Mention the actual scale of the scrip and then click on the low . Horizontal lines will appear on the screen.
