

PLANETARY LINES

This will plot planetary lines on the calendar day chart. For applying this tool, we have to click on the planetary lines icon. Then it asks for entering the first date of the said scrip. Next click on the plot button. Twice it will open a MATCH FOUND window. After clicking on the OK button planetary lines will appear. These planetary lines are of Jupiter, Mars, Mercury, Moon, Neptune, Pluto, Uranus, Saturn, and Venus. Since our chart is Mitotic scaled which is related to 360 number it gives the accurate result.

How to apply Planetary lines:-

- First go to calendar day chart.
- Click on the planetary lines icon  on the toolbar 1.
- Enter the first date of the said scrip.
- Next click on the plot button.
- Planetary lines get drawn.
