Scaling of graph is the soul of study, you can enter current price of scrip in the box mentioned as rate and press ok, you will get scale of the scrip. You need to mention scaling of graph in daily scaling box, all the other time frame scaling will get adjusted automatically. Finally, select the name of scrip appeared in list

box and press plot single scrip button, wait for plotting to complete. Pop up windows will disappear, now you can see your chart in list menu on left side of software. If not, close the software and reopen it, else you can press refresh button on top of list appearing on left side of software. If you want to delete any unwanted chart, you can select the name in drop down menu and press delete button.

If you want to update all the charts existing in software, click on plot multiple scrip icon. You will get Following pop up window

If you select All Scrips icon all scrip in software will get updated .When you click selected scrip icon you can select any particular folder or even any specific scrips and update them at once. When you select All watch list button only your selective scrip will update.
